Special Announcement!

O Original
P Phenomenal
I Irresistible

Revolution is here!

Finally, a long lasting manicure is available
for those who are afraid of UV light.

OPI will go down in history for creating a nail curing system with LED lights.

LED lights are used right now in treating body injuries, acne, and improving skin conditions. OPI scientists developed a blue LED light which cures gel polish in only 30 seconds without any side effects.

And We Have It!!!

Several of our technicians are certified to use
the new OPI gel-colors and they love it!

As of Wednesday November 9, 2011 all of the Iconic OPI colors
are available at Renu in gel form.

The good news gets even better:

The 30 minute manicure will cost \$34 for Regular and \$36 for French.

We will still continue using Shellac for those who love it.

30 iconic OPI colors
Lighting Speed, 30 second cure
Non-damaging application and removal

High-gloss shine that lasts for weeks
Cures with non-invasive LED Light
Fast, polish-on application
